

Driver License and Identification Cards

- Driver License
- Under 21 Vertical
- Back of Driver License
- Laminate Feature
- Ultraviolet Feature
- Interim Document
- Commercial Driver License
- Foreign National (FN)
- Vessel License
- Non-Driver Identification

Greater Security and Benefits

In the Winter of 2005, Alabama will begin issuing newly designed driver licenses and identification cards. Technological advances make these the most secure cards Alabama has ever issued. This technology includes a 2-D barcode, magnetic stripe, digitized portrait image, signature and various security features. Alabama's new card design includes the state capital and state seal.

Features of New License

The portrait and signature are both digital and stored in a permanent database for easy retrieval in order to verify identification.

The "Under 18/21" driver licenses and identification cards are now issued in a new vertical format that is immediately recognizable. Under 18/21 cards display the words "UNDER 18 UNTIL" and/or "UNDER 21 UNTIL" followed by the date the cardholder will turn 18 or 21 in bold red text. This text is positioned vertically next to the portrait.

Laminate Feature

Laminate coating on the front and back increases the card's durability, security and tamper resistance. On the front there is an "optically variable" image of the state outline with "Alabama" text that changes color as one tilts the license for viewing.

Ultraviolet Feature

The state seal of Alabama will fluoresce a full color image when enhanced with an ultraviolet (UV) light source.
