

ONTARIO

What to look for in an Ontario Driver's Licence:

Should match year of birth.

Should match day of birth.

Should be first letter of person's last name.

Should match the person in front of you.

The last six digits on the licence number should match year, month and day of birth (females have 50 added to their birth month, e.g. 51 for January and 61 for November)

The background has a holographic overlay, as well as micro and rainbow printing.

Year, month, and day of birth.

Checking a Driver's Licence

1. Ultraviolet inks are used during the manufacturing process to enhance the security background and also to add two distinct UV features, an Ontario logo on the front and a stylized Trillium flower on the back. Both are visible only under an ultraviolet (blacklight) source.

2. Raised lettering on driver's licence number and date of birth.

3. Protected secondary photo and signature at the bottom right corner. Other security features appear when you tilt the card from left to right.

4. The machine-readable barcode contains bearer-related data.

Note: Versions of this driver's licence will be in circulation until November 2014.

Note: A driver's licence issued between December 2007 and April 2011 will have a magnetic stripe across the back of the driver's licence as well.
